

COMPANY PROFILE

**Atlantic
Surveyors (Pvt) Limited**

ATLANTIC SURVEYORS (PVT) LTD.

Company Overview:

Atlantic Surveyors is a Private Limited Company engaged in providing various types surveys including stockpile volume survey, topographical survey and road survey. Moreover, we provide quality & quantity inspection, calibration and integrity assessment of storage tanks and tank lorries.

The Company has license from PEC (Pakistan Engineering Council) and is licensed to act as Surveyor & Adjuster by SECP (Securities and Exchange Commission of Pakistan). The company.

ATLANTIC SURVEYORS (PVT.) LTD is an innovative, leading provider of professional inspection and survey services and is a preferred inspection partner of many leading international trading companies, shipping and insurance companies. We provide cost effective supervision, consulting, sampling and analytical solutions which are tailored to meet individual client requirements. Our international network of offices enables us to supply first class services at client site either warehouses, stores, manufacturing, ports of loading and discharge

We are among very few companies in this region having expertise to provide the monitoring of the commodities manufacturing & distribution (i.e. Agriculture Products, Natural Resources, Textile, Crops, Grain, Seeds, Cotton, Wool, Gas, Petroleum, Petrochemical and Fertilizers) process in the factory. We are very much involved in commodities distribution supervision and monitoring activities in Pakistan, especially since 2005 earthquake and now in operation of SWAT IDPs, for monitoring the distribution of commodities we follow the standard distribution monitoring tools, following by the guidelines of UNHCR, our major client is Pakistan State Oil Ltd, WFP Pakistan and Afghanistan.

Accreditations: Certifications / Licenses

- Licensed by Pakistan Engineering Council (PEC)
- Registration with Pakistan Standards & Quality Control Authority (PSQCA)
- Master Mariner, Marine Surveyor, Insurance & Fire Surveyor, Machinery & Breakdown Survey issued by SECP
- ISO-9001-2015, ISO/IEC 17020:2012 (Practicing),
- Licensed by Weights & Measures Department, Govt of Sindh
- Member – Association of Surveyors & Loss Adjusters of Pakistan,
- Member - Karachi Chamber of Commerce Association

World-wide Coverage

Atlantic Surveyors (pvt) Ltd being the parent company and its sister concern CISCO LTD under the ownership of same Directors have their own network of offices in 4 countries

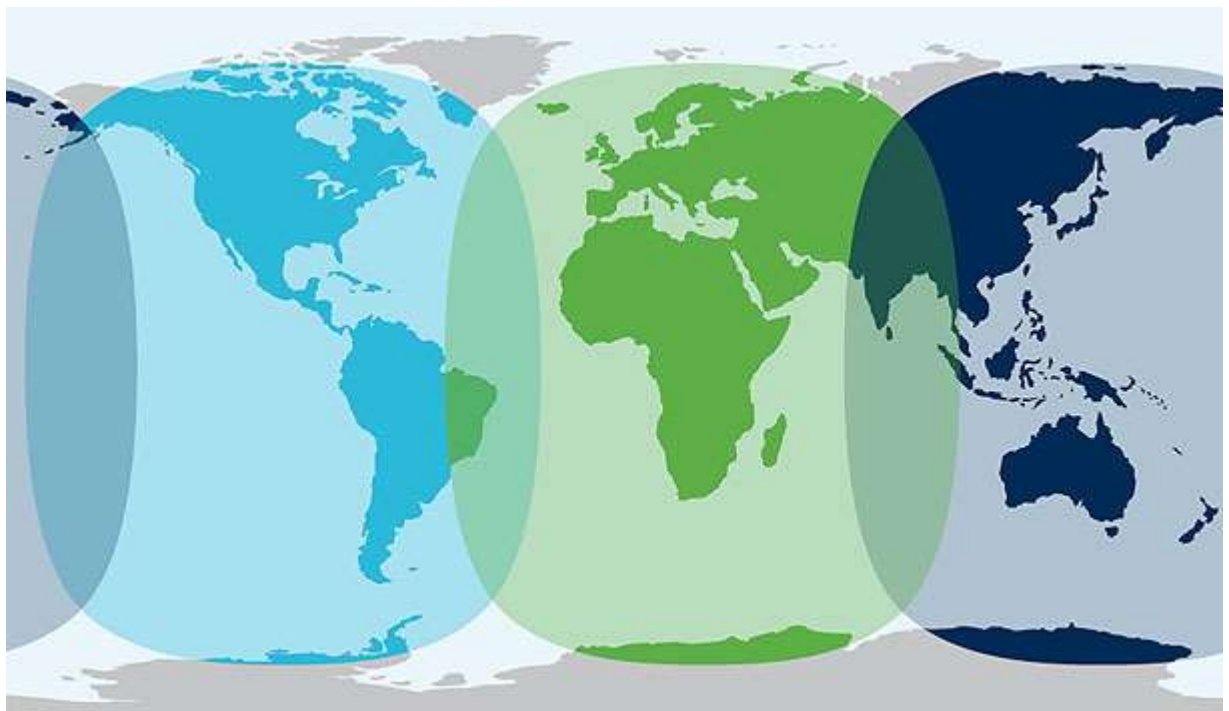

- Pakistan (Head Office in Karachi, + sub-offices in all major Cities)
- United Arab Emirates
- United States of America
- Afghanistan

providing services of pre-shipment and post-shipment inspection to our prestigious clients which include the United Nations World Food Program, Trading Corporation of Pakistan, Fauji Fertilizer, Trading Corporation of Pakistan and Pakistan State Oil.

Global Partners

Through our global affiliates M/s TCI (Belgium) and Geo-Ghem (Middle East), we are also providing our services at load ports in

- USA, China
- European countries
- African countries
- Middle East
- Far East

Our Services

ENGINEERING SERVICES

ATLANTIC SURVEYORS (PVT.) LTD is a professionally managed organization dedicated to application engineering. We specialize in providing following user specific services:

When you work with ATLANTIC SURVEYORS (PVT.) LTD's Inspection Services, you work with the BEST. Highly trained and Professional attitude is what you get from our rich pool of human resource.

The high-tech equipment's used ensure authentic results and the dedicated team delivers time-oriented accomplishments. Sophisticated state-of-the-art technologies and manpower facilities are what make ATLANTIC SURVEYORS (PVT.) LTD a reliable procurement source. The wide area of its application in the industry is its key characteristics. Customer-satisfaction being its core goal, efficiency in all its wings is a norm here.

The adequate support, infrastructure, manpower, technologies, services is all there with ATLANTIC SURVEYORS (PVT.) LTD's Inspection Services. All that is needed is moving your fingertips and getting in touch with us –to enable us to help you recognize and maximize your end goal- i.e. Profits.

1. CALIBRATION OF STORAGE TANKS

Calibration is the science of determining the exact true volume of a containment system corresponding to a certain measurement value. It is key to obtaining accurate measurements of quantity. Without accurate calibration tables, even the best gauging systems and the most accurate manual measurements are of little value. With Atlantic Surveyors as your calibration partner, you can be sure of the highest degree of measurement accuracy, helping you to maintain client confidence and preventing costly errors.

Calibration of storage tanks using Optical Reference Line Method as per API 2.2B (Revised API standard 2550). Tank bottom is calibrated by using liquid fill method as per API 2555.

Tank Settlement Survey / Report of shell and bottom

2. INTEGRITY ASSESSMENT & NON-DESTRUCTIVE TESTING

- Visual Inspection
- Shell Survey
- Bottom Survey
- MFL (Magnetic Flux Leakage) of tank bottom
- Vacuum Box Testing of tank bottom
- UT gauging of tank bottom / roof / shell
- Welding Procedure Tests
- BOQ PREPARATION
- Visual Inspection of Tank
- Dye/Liquid Penetrant Examination (PT)
- Magnetic Particle Testing (MP)
- Ultrasonic Testing (UT)
- Radiographic Testing (RT)
- Positive Material Identification (PMI)

3. TANK CLEANING

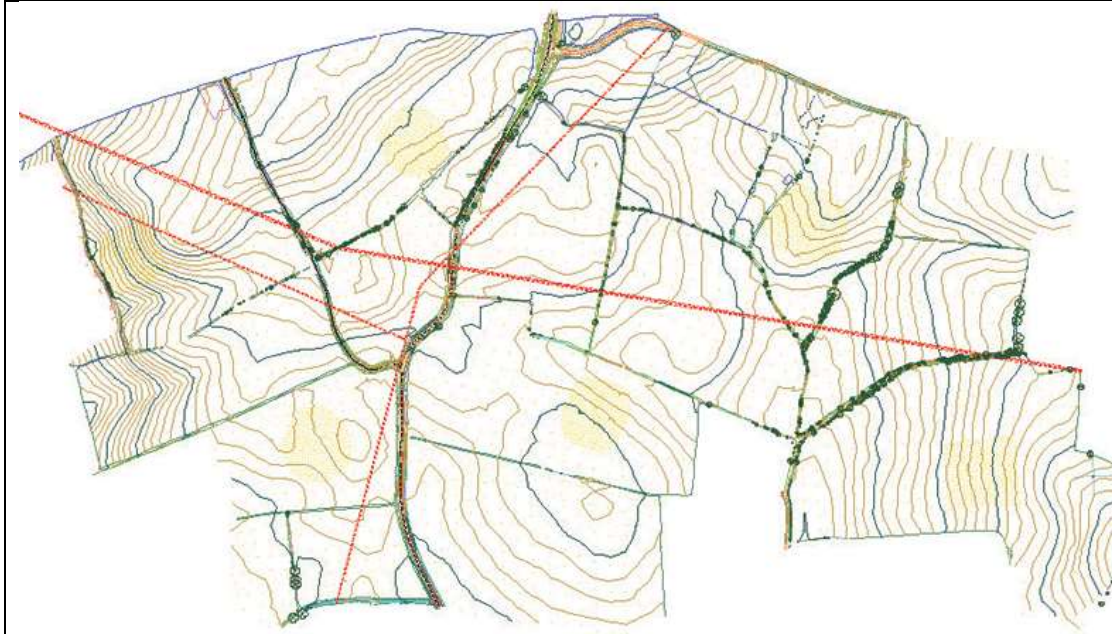

We provide cleaning services of shore tanks.

- Sweep Blasting
- Desludging
- Complete cleaning of shell and bottom.

4. TOPOGRAPHICAL SURVEY

Topographical Survey of land determines the relative locations and specifications of natural and manmade features within an area of land surface by measuring horizontal distances, differences in elevation and directions.

5. STOCKPILE VOLUME COMPUTATION

We provide our expert services in conducting survey stockpiles for the purpose of calculating volume and tonnage.

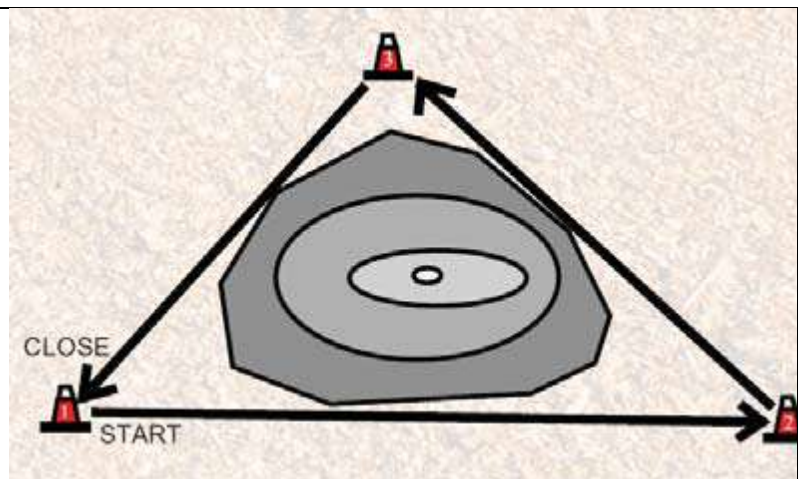

We use modern state-of-the-art equipment of optical measurement. Total Station is an instrument of laser technology trusted for accurate results and precise measurement of horizontal and vertical angles.

This method is widely used for measuring the stockpiles of various commodities such as:

- 01- Coal
- 02- Cement
- 03- Rock Phosphate
- 04 Fertilizer

Total Station

A closed TRAVERSE with 03 control points covering all sides of the stock pile both horizontally and vertically

6. HYDROSTATIC TEST

We perform Hydrostatic (Hydro) Testing of tank lorries in order to check the strength and leaks. Hydro tests are performed before commissioning of new tank lorries and on annual basis thereafter.

To test the soundness of welded joints and associated pressure parts of the tank.

To prove the strength of the tank pressure parts at a pressure greater than the working pressure of the tank at ambient temperature.

The hydraulic test of tank lorries is carried out at the following conditions / situations.

- On completion of the tank erection activities
- On completion of repair work
- On completion of annual overhaul
- At the request of statutory authority to fulfill the statutory requirements.

7. CALIBRATION OF EQUIPMENTS

- Pressure Gauges
- Safety Valves
- Temperature Gauges

8. CALIBRATION OF TANK LORRIES

There are around 15000 tank trucks operating across Pakistan for transportation of liquid fuel. These tank trucks play pivotal role in fulfilling the fuel requirement of power plants, industry, commercial transport and general public vehicles.

PSO alone has over 50 percent share in the overall business of OMCs. Thus, PSO has country's largest fleet of tank trucks comprising over 8500 tank trucks.

Cargo received and delivered by these 8500 tank trucks is measured on the basis of CALIBRATION CHART necessarily available with each tank truck.

9. ENVIRONMENT PARAMETERS TESTING :

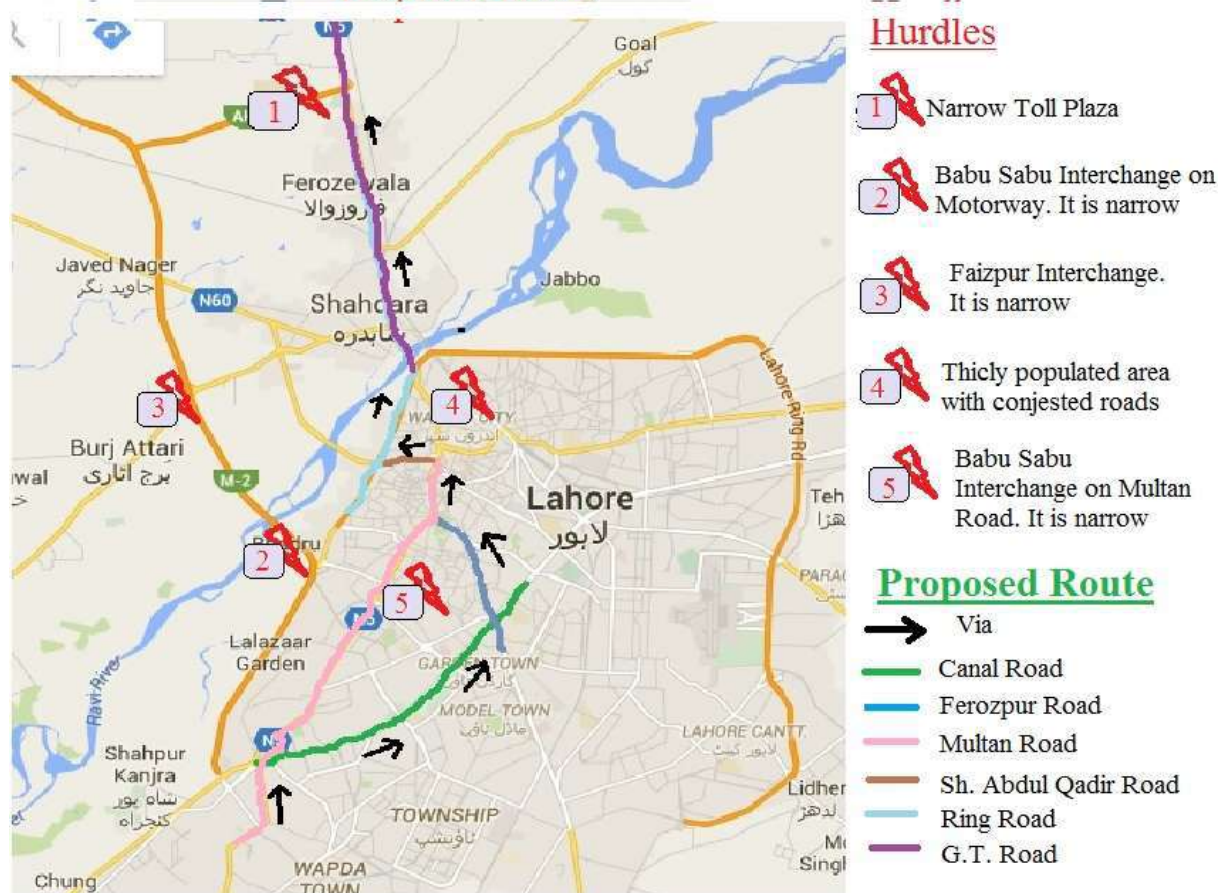

- Emission Testing.
- Noise Level Testing.
- Safety Audit and Training.
- Effluent Chemical Analysis.
- Ambient Air Quality Monitoring.

10. ROAD SURVEY:

The objective of Road Survey is to assess the condition of the route, make findings of the hurdles, road width and road surface condition in order to assist our client in determining the feasibility of transporting large volume consignment

MAP # 09

Hurdles in Passing Through Landmark-7 (Lahore City) and Proposed Route

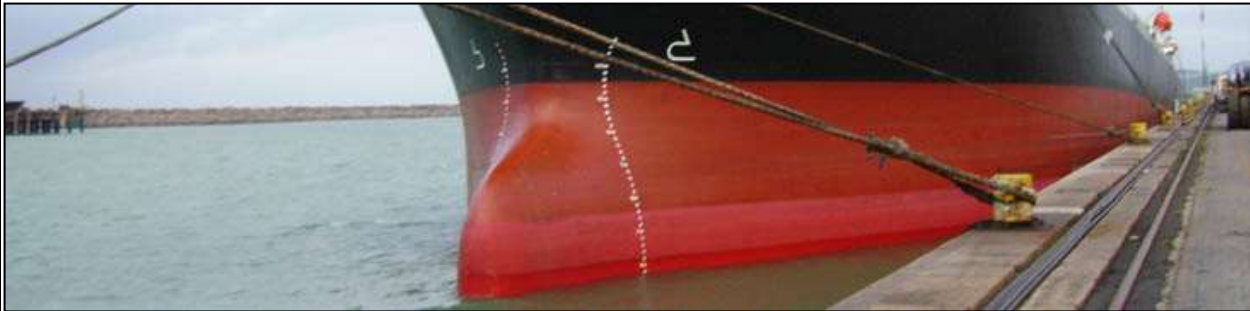

MARINE SURVEYS & INSPECTION

11. DRAUGHT SURVEY

Draught Survey is a calculation of the weight of cargo loaded or unloaded to or from a ship. This technique is based on Archimedes' principle and is mainly used for measurement of bulk cargo. The Parent Company has decades-long experience in conducting Draught Surveys.

We have conducted tens of hundreds of Draught Surveys for Urea, Fertilizer, DAP, Wheat, Coal and Cement.

12. PRE-SHIPMENT INSPECTION

Also called PSI, is an important and reliable quality control method for ensuring that the goods supplied by the seller to the buyer strictly complies with the contracted specifications. After ordering a number of articles, the buyer lets a third-party quantity and quality control the ordered goods before they are dispatched to him. Normally an independent inspection company is assigned with the task of PSI, as it is in the interest of the buyer that an independent third party verifies the quantity and quality. This way the buyer makes sure, he gets the goods he paid for. Pre-shipment inspection can greatly avoid the risk of fraud and ensure that clients get quality products from suppliers. The pre-shipment inspection is utilized for:

- Checking the total amount of goods and packing
- Controlling the quality and/or consistency of goods
- Verifying compliance with the standards of the destination country.

13. PRE-PURCHASE OF VESSELS/SHIPS

A pre-purchase survey is an in-depth, thorough evaluation of all the vessel's systems. When conditions permit, the inspection includes operational testing of all equipment. The vessel must be hauled out of the water for hull inspection. A sea trial is also highly recommended and is generally included in the cost of the survey when conditions permit and the sea trial is conducted on the same day as the inspection. Other inspections include rigging, machinery and electrical systems. Given today's complicated vessel system, specialists should be consulted when circumstances dictate such as with large diesel-powered machinery and complicated electronic systems. A Pre-purchase Survey report is designed to assist you in post survey negotiations, scheduling required repairs, completing routine and preventive maintenance as well as making decisions for upgrades in the near and distant future. A pre-purchase survey is a systematic, thorough, and operational evaluation of the entire vessel's structure, systems and equipment that includes, Hull, deck, & structure, Machinery installations, Fuel, Exhaust and Electrical systems, USCG-mandated safety gear, cargo gear and Operational test of monitoring.

14. OFF-HIRE/ON HIRE OF VESSELS/SHIPS

When hiring a vessel, the charterers have the responsibility for returning the vessel to the owner in much the same condition as she was in at the beginning of the charter, including the quantity of Bunkers onboard. To ensure this, it is usual for the parties to retain the services of a surveyor at the beginning / completion of the charter to record the condition principally of

the cargo gear, the holds and ship's structure in the vicinity of the cargo working areas. A full

report is generated. Documentation/ on hire status report, including color photography if required of any vessel damage noted, similarly for vessels completing a charter, an off-hire survey is conducted, and a full report generated.

15. OFF-HIRE/ON HIRE OF CONTAINERS

ATLANTIC SURVEYORS (PVT.) LTD specializes in providing inspections on tank containers, reefers and box containers, providing the most common services, in addition to a wide range of specialized services. These services include periodic 2½ and 5 years inspections, gas free inspections, wall washes, lab-analyses and insurance assistance. If a tank passes the test a certificate is issued stating that the container can be in-service for a specific period of time. Tank Container, Rail Tank Car and Box Container Inspections, all common and special surveys are performed. Examples of these surveys are on-hire surveys, off-hire surveys, cleanliness inspections and for the rail tank cars, verification. All the reporting is provided electronically and is also stored on our servers. The protected, user friendly, database allows you to search your reports over the years.

16. BUNKERS SURVEY

Bunker surveys offer an independent and impartial quantity measurement service for marine fuels. We provide comprehensive documentation for each survey to support any shortage claims or quality disputes. Our bunker quality and quantity survey is known to be the most thorough fuel measurement service in the market and involves:

- Pre-delivery tank measurements on both the bunker tanker and the receiving vessel
- Proper fuel sampling procedures
- Post-delivery tank measurements on bunker tanker and receiving vessel
- Photos on sampling where permitted
- Re-calculation of quantity delivered and received based on tested density
- Comprehensive survey report

For easy access we have an extensive network of surveyors who can provide bunker quantity measurements in major ports of call. Periodic skills upgrade and regular on-the-job inspections by senior staff help our surveyors maintain top service quality at all times.

17. Handling Project / Bulk Cargo

We have vast experience in handling project cargos/ bulk consignments discharging from vessel and loading / unloading supervision with respect to quantity survey and report of loss / damages (if any)

We have handled project cargoes of

- Vehicles / Trucks
- Cranes
- Turbines
- Machinery
- Transformers
- Steel Coils
- Wooden Boxes
- Industrial Cargo

18. LNG AND LPG SURVEY

This consists of quality & quantity surveys of Liquefied Petroleum Gases and Liquefied Natural Gas vessels with supervision of Pipeline transfers and calibration of Storage Tanks.

LNG is liquefied natural gas, which is the very cold liquid form of natural gas. LNG carriers are generally specialized ships transporting LNG at its atmospheric pressure boiling point of approximately -162-degree C, depending on the

cargo grade. LNG carriers were typically in the range 80-135,000 m3 up until 2006 while ATLANTIC SURVEYORS (PVT.) LTD was the first company in Pakistan who inspected the LPG vessel back in 1993 and never looked back ever since.

19. LOADING/DISCHARGING SUPERVISION/SUPERINTENDANT

Loading and discharge supervision is part of a range of other transportation & shipping services for the industry which include, Cleanliness inspections, Logistic support, Damage surveys, ATLANTIC SURVEYORS (PVT.) LTD. Loading and discharge supervision expertise for the industry comprises of:

- Sampling and testing for quality, Quantity and Weight verification, Packaging & labeling verification, Control of loading and discharge operations, Grading and certifying the reception of produce and shipments, Temperature monitoring, Traceability

20. POST STUFFING INSPECTION

- The doors and, if applicable, roof covering have been carefully closed.
- Closures are secured with metal and other seals in order to reduce the risk of theft.
- If the cargo is covered with tarpaulins in special containers: the tarpaulins are securely fastened.

- Old adhesive labels have been removed. For refrigerated containers with refrigeration unit and heat-able tank containers: the correct temperature has been set. For refrigerated containers, the temperature recorder is running and the temperature is displayed.

21. HATCH INSPECTION

Hold and hatch inspection is part of a larger service that ATLANTIC SURVEYORS (PVT.) LTD. provides to assure that the shipped material will be received in the same condition as when it was loaded. Buyers or sellers can order visual inspection of the hold prior to loading. This gives both parties the confidence that the cargo will not be contaminated by material already in the hold, or altered in any way by vessel deficiencies. Our inspectors will immediately report any abnormalities to the appropriate authority. Digital photographic documentation is also provided. Certificates of inspection are provided upon completion of the job, thereby minimizing transit losses.

22. CONTAINERS INSPECTION

Containers Stuffing/De stuffing

Before packing inspection involves the inspection and checking of container inside and outside where the following are checked and verified.

Outside the container:

There are parameters and specifications check during the container inspection from outside of the containers, i.e. No holes or cracks in walls or roof, Doors operate properly, closing devices operate properly, no adhesive labels from the previous cargo, e.g. IMO placards, for flat racks: stanchions (if ordered) are complete and correctly fitted. For 40' flat racks: all lashing belts are present, for open-top containers: roof bows are complete and correctly fitted, for open-top containers: tarpaulins are undamaged and fit properly; ends of tarpaulin ropes are undamaged; all roof eyes are present, for hard-top containers: roof is undamaged, roof locking mechanism fits and operates properly.

Inside the Container:

For inside inspection of the container there are parameters need to be considered, i.e. Container is watertight. Test method: enter container, close both doors tightly and look for incoming light (e.g. through cracks, holes, door gaskets etc.), Container interior is absolutely dry. (Wipe up any condensation or white frost in order to avoid corrosion and moisture damage of the cargo.), Container is clean, free of cargo residues and neutral in odor, No nails or other protrusions, which could damage the cargo.

23. INSURANCE SURVEY

We are on the panel of major insurance companies of Pakistan and have successfully carried out the following on behalf of insurance companies.

- Assessors / loss adjusters, Investigation of marine claims
- Assessment of loss within the scope of applicable policy
- Adjustment of loss as per terms / conditions of relevant insurance policy
- Salvage and disposal of partial losses and CTL goods.

Fire Surveys:- Relate to material damage to building, plants, machinery & stocks and consequential loss due to fire.

Marine Surveys:- Consists of surveys of Cargo, Hull, Valuation, Pre-acceptance Inspection and Cargo Loss Minimization.

Engineering Surveys:- Consists of Machinery Breakdown, Boiler Explosion, EAR, CAR, CPM, MCE, EEI, Deterioration of Stock, Loss of Profit.

Misc. Surveys:- This covers Banker's Blanket Policy, Jeweler's Block Policy, Cash in Transit Policy, Shopkeeper's All Risk, Third Party Public Liability etc.

Valuation:- Valuation of Fixed Assets for various purposes.

24. MARINE AND INDUSTRIAL CONSULTANCY

Marine & Industrial Consultants from the last two decades is serving not only the National Shipping Companies but also many foreign shipping companies with a wide range of products available for logistics and industrial usage.

- As the authorized agents for of various cargo and shipping companies we have been providing services and technical consultancy for shipping related activities
- We also offer: -We are ONE-STOP company for all your shipping as well as Industrial needs. We assure you our best services and close attention at all times.

25. OUR SERVICES AS A SOFTWARE HOUSE

We not only provide web designing and application development services but we also help our customers with their company's digital marketing and creative strategies. We cater and customize our services based on the company's business needs and ideas.

Digital Marketing:

Digital marketing means to market products and services on the internet, mobile phones, display advertising and other digital methods, using the digital media and technologies. The digital channels used are search engines, websites, social media, email, and mobile apps. The word comprises of a vast variety of marketing techniques, however only the most used and important ones will be covered below in detail.

SEO:

Search Engine Optimization is an important skill that gets companies the digital audience they require. In order to stand out from the many companies that use this technique, one must know how search engines work and use the right strategy to rank high on Google, Bing, Yahoo, and other websites. Coming up with the right strategy takes time; if you don't think it through, you will be held accountable for "spamming" by Google. We will help you and your company to come up with effective SEO plans. This will not only help you build your company's reputation but also, give you the digital exposure you require. Through social media, blogs, email campaigns, and progress analysis, we will help you obtain the best Google ratings.

Web Development:

Web development, as the name suggests, means to develop a website for the internet or intranet. Whether you need a simple, static one-page plain text, or a complex web-based internet application/ website, we will create it for you. The tasks we excel in are Web Engineering, web content development, client-side scripting, web server, network security configuration and e-commerce development. With some of the best coders and developers as part of our team, your website or internet application will be up and running in no time.

Application Development:

Since client satisfaction is our main purpose, your thoughts and ideas will always be put first to understand your business requirements. After an in-depth evaluation of your ideas and needs, we will begin to design the website. Your feedback will be appreciated and taken into consideration every step of the way. It will only be launched when you are completely satisfied. The site will be tested multiple times to ensure it operates and functions smoothly, is in-tuned with various browsers, and welcomes visitors from around the world on the site. Our technical staff is very pro-active and accommodating; they will provide you with a range of design and styles according to your business need and size of the website.

Social Media Marketing:

This technique uses social media platforms such as Twitter, Instagram, Facebook, Snapchat, etc. to gain publicity and attention for various services and products. This is the most trending technique these days. Though almost everyone uses it, there are ways to stand out. We ensure your company gets the right social media exposure, which helps it grow and flourish.

Graphic Designing:

This is a skill that combines communication with graphics, visuals and art. It is an effective way for the company to make an impact on the audience/customers by being to the point. Our team of Graphic designers will provide customized services based on your company's marketing need. All the illustrations, posters, info-graphics, layout and designs will be within your budget, but out of your expectations!

26. COLLATERAL MANAGEMENT SERVICES (MUCADDAM)

Being a reputable and reliable Mucaddam organization, we have set out standard procedure for providing our services in a highly professional manner and in line with our clients' requirements.

Upon receipt of instructions from our valued clients to take over a certain pledge, we mobilize our team of experts for preliminary checking and scrutiny of the stock. Once the stock is satisfactorily taken over, our godown-keepers keep vigilance round the clock.

For effective controlling of the pledge on behalf of Banks, we take following actions.

- (a) Safety, security and fire-fighting arrangements are checked and discrepancies (if any) are intimated to the borrower as well as the Bank.
- (b) Godown-keepers are briefed from time to time non the nature of pledge they are supposed to monitor
- (c) For strict compliance and control, check-lists have been laid down for our Supervisors / Regional Offices giving them guideline for conducting spot-checking and ensuring compliance.
- (d) Close liaison is maintained with the Bank to ensure smooth running of the pledge. Any unusual behavior by the borrowers on site is reported to the bank to assist the bank in their decision-making.
- (e) Bank's Board, Stock Register, Bin Cards, Locks and Stickers (as when required) are placed on the site.
- (f) A team of inspectors regularly visits the sites for the purpose of inspection. They submit report of their findings / non-compliances (if any) to the main office.

◆ Inspection of Hypothecated Stock

We carry out inspection of stocks on behalf of Banks all over the country, through our qualified and experienced inspectors.

On receipt of assignment, our inspector visits the premises and conducts physical stock-taking.

The inspector also checks safe custody & security arrangements, visual quality and marketability of the stock.

The report of inspector's findings is submitted to the Bank in the required format.

◆ Panel of Muccaddam Services:

- ☞ National Bank Limited NBP
- ☞ Habib Bank Limited HBL
- ☞ United Bank Limited UBL
- ☞ Bank Alfalah Limited BAF
- ☞ Faysal Bank FBL
- ☞ Habib Metro Bank HMB
- ☞ Standard Chartered Bank SCB
- ☞ Albaraka Bank Limited ABB
- ☞ Bank of Khyber BOK
- ☞ Bank Al-Habib BAH
- ☞ Trading Corporation of Pakistan (Pvt) Ltd.

27. HR CONSULTANCY

- ☞ ATLANTIC SURVEYORS (PVT.) LTD Consultant has specialized in representing qualified HR professionals for direct-hire, contract and consulting positions with companies of all sizes. - AND OTHER Value-added trainings as per requirements of client

28. ATLANTIC SURVEYORS AFGHANISTAN

ATLANTIC SURVEYORS (PVT.) LTD Afghanistan engaged in inspection and surveying activities, our inspectors and surveyors provide supervision services around the clock, seven days a week. From the moment of nomination receipt to electronic delivery of our detailed inspection report, you can be sure that our expert surveyors, tallymen and inspectors are protecting your interests. We have experience and product knowledge of a vast range of commodities and offer highly competitive rates. Whether your cargo is in bulk, bagged or liquid form, allows ATLANTIC SURVEYORS (PVT.) LTD Afghanistan to represent you at stores, production sites and ports throughout the world:

- Grading / Tallying
- Loss prevention
- Size verification
- Calibration checks
- Marking verification
- Radioactivity testing
- Temperature testing
- Bagging supervision
- Explosive free checks
- Moisture determination
- Representative sampling
- Water Ingress investigation
- Damaged cargo investigation
- Random bag weight verification
- Inspection for manufacture defects
- Rejecting out of specification product
- Supervision of stevedoring operations / stowage
- Cross referencing product discharged against packing list
- Checking transport is clean and acceptable to carry product
- Witnessing packing and banding to ensure appropriate application
- Silver Nitrate testing (to check whether water present is saline or fresh)
- Quality control - checking product conforms to contractual specifications
- Full supervision of discharge ensuring product is handled in a correct manner
- Weighbridge control issuing all drivers with our own weighbridge control tickets
- Full supervision of loading ensuring product is stowed correctly aboard vessel or into container
