SERVICES

We are committed to perform high quality NDT (Non-destructive testing), lifting / Process equipment inspection, training & certification services for integrity, safety & reliability.

Our highly experienced NDT inspection team utilizing tools and equipment with competitive pricing and fast turnaround time will provide our valuable clients an ideal quality assurance solution.

We have the ability to take projects of any magnitude, from niche ones - off inspection to complete NDT services solution for a green & Brown field project.

The service is rendered through well-defined procedures and in compliance with all applicable codes, standards & specifications.

LIFTING INSPECTION

We offer a complete range of onsite lifting equipment inspection and testing services to ensure your lifting equipment/accessories adhere to the strict industry requirements.

NDT (Non-Destructive Testing)

We are committed to performing high quality NDT inspection services on our customer's products for integrity, safety, and reliability.

Our highly experienced NDT inspection team utilizing tools and equipment with competitive pricing and fast turnaround time will provide our valuable clients an ideal quality assurance solution.

INDUSTRIAL INSPECTION

We have capability to ensure integrity of all types of pressure vessels, tanks (underground above ground), piping circuits & rotary equipment

CALIBRATION

We have capability to calibrate all types of process instruments.

- Flow measuring devices
- Level control and measuring devices
- Pressure temperature gauge and transmitters

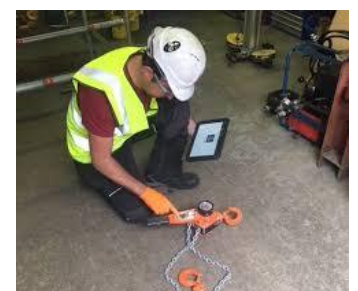

SERVICES

DESCRIPTION

- Lifting Equipment Inspections & Elevator Inspections– LEEA (Lifting Equipment Engineers Association)
- Warehouse Rack Inspection as per SEMA Guidelines.
- API inspection 653, 510, 570, 1169 - Pipelines, Storage Tanks, Pressure Vessels
- Heat Exchangers, Air receiver vessels, Boilers etc.
- Conventional NDT Testing (UFD, UTG, MPI/DPT
- Holiday Testing, Hardness
- Testing, Boroscopy / Videoscopy, Thermography, Coating Thickness etc.)
- Welder Qualification, Welding Procedure and other Welding related services.
- Third party Vendor and stage inspections (Expediting Services / Vendor Assessment etc.)
- Quality Assurance / Quality Control (QA/QC)
- Supervision.
- Bowser Inspection.
- HSE and Technical Training Services with Certifications of Crane Operators, Forklift Operators, Riggers etc.
- Project Quality Management Services.
- Post Weld Heat Treatment PWHT Services
- Audits & Gap Analysis (Electrical, Safety, Civil, Mechanical, Fire etc.)
- Awareness Trainings on QMS, EMS and OHSAS and IRCA Related Courses.
- Horizontal and Vertical Land Tanks Calibration
- Internal and external tank calibration
- Pipeline Volume Calculations

LIFTING EQUIPMENT INSPECTION SERVICES

Atlantic Surveyors Pvt Ltd. is an ISO & OHSAS Certified Company for inspections, NDT Testing & Certification Services, providing Third Party Inspection & NDT Testing for all types of Lifting Equipment and Lifting Accessories.

We have qualified and competent LEEA Certified Inspectors and NDT Level II, I Inspectors having rich work experience for Lifting Equipment and NDT Inspections as per the ASME / BS / LEEA Standards

Guidelines requirements. To supplement thorough examination on any item of lifting equipment we provide the most comprehensive NDT methods available as may be required. Our inspection teams are multi skilled and are certified ASNT Level II according to SNT-TC-1A in different NDT methods such as MT, PT, VT, UT, RT and ET.

As appearing Development member of LEEA we follow strict codes of practice recommended by the association and in accordance with international standards and regional statutory requirements. We never compromise our Lifting Equipment Inspection Quality Standard.

WE PROVIDE

- Load Testing Services
- Proof Load Testing Services
- Recertification Services
- Mobile / Overhead Cranes, Lifting Basket, Elevators
- Jacks / Chain Blocks / Fork Lifters / Pipe Layers etc.
- Lifting Accessories
- Wire rope / Webbing Slings,
- Shackles, Eye Bolts, Hooks, Turn Buckles
- Safety Harness / Lanyards, Lifting Clamp Plates
- Lifting Tongs, Wire Clamp etc.

PALLET RACKING INSPECTION SERVICES

Atlantic Surveyors Pvt Ltd is an ISO Certified Company providing Warehouse Rack Inspection Services as per SEMA- 1980 (UK) Storage Equipment Manufacturer Association (SEMA) Pallet Racking code of practice Guidelines.

Are the racks plumb and level? This is an issue with rack systems that have been reconfigured, poorly installed, or in areas where there may be foundation settling. The floor may have been inadequate and the rack installed with extensive shims, which can move and skew. Collisions may have a greater impact on racks that aren't set level. If you see crooked racks, rows out of alignment, or vertical leaning, consider it a red flag.

Are any metal component rusted or corroded? This is worth noting as it is an indication of potentially weak metal beneath. If paint is scraped, a rack may have suffered a collision.

Is the rack overloaded? This question can't be answered at a glance, but overloading is a prime cause of rack failure and the catastrophic damages & injuries that can follow it, so it needs to be addressed in any good inspection. It is an easy mistake to make and it's made far too often. If the rack is older, it may not have capacities stamped or posted on it. Changing the load without checking capacities is a serious issue. Remember that beams have rated capacity per pair, and that uprights depend to a great degree on beam spacing for their capacity ratings. Visit your rack supplier's technical documentation to find those ratings for your pallet rack.
