

COMPANY PROFILE

Atlantic Surveyors (Pvt) Limited

Marine Surveyors, Cargo/Valuation Consultants, Loss Adjusters & Bank Muccadams

We would like to introduce ourselves as a reputable Company involved in **Consulting, Inspection, Testing & Training Services for businesses**. In general we provide services to guide organizations by developing / managing their systems and operations to meet the requirements of international standards, buyer's code of conducts, and continual improvement. Our company ATLANTIC SURVEYORS Private Limited registered in the year 1984. The Company is involved in providing expert services primarily to the consulting including the management systems, technical, Marine & Insurance Industry. The services provided under the domain of the group companies.

ATLANTIC SURVEYORS (PVT.) LTD is an innovative, leading supplier of professional inspection services and specialist cargo surveys and part of the CISCO LTD LLC group and is the preferred inspection partner of many leading international trading companies, shipping companies and insurance agencies. ATLANTIC SURVEYORS (PVT.) LTD provide cost effective supervision, consulting, sampling and analytical solutions which are tailored to meet individual client requirements. Our international network of offices enables us to supply first class services at client site either warehouses, stores, manufacturing, ports of loading and discharge

We are among very few companies in this region having expertise to provide the monitoring of the commodities manufacturing & distribution (i.e. Agriculture Products, Natural Resources, Textile, Crops, Grain, Seeds, Cotton, Wool, Gas, Petroleum, Petrochemical and Fertilizers) process in the factory. We are very much involved in commodities distribution supervision and monitoring activities in Pakistan, specially since 2005 earthquake and now in operation of SWAT IDPs, for monitoring the distribution of commodities we follows the standard distribution monitoring tools, following by the guidelines of **UNHCR**, our major client is **Pakistan State Oil Ltd, WFP Pakistan and Afghanistan**.

CERTIFICATION / LICENSES:

- ISO-9001-2008, ISO/IEC 17020:1998 (Practicing),
- Master Mariner, Marine Surveyor, Insurance & Fire Surveyor, Machinery & Breakdown Survey

Vision

We will earn our clients satisfaction,

and trust through continuous improvement

driven by the integrity, teamwork,

and innovation.

Mission

*Our Mission is to facilitate executive to create a
more efficient, more Productive, more profitable
and more successful enterprise by implementing
organization improvements that are effective and endure.*

BUSINESS SCOPE RANGE

The Company has experienced in inspection and surveying field in the following scope of activities:

- MANUFACTURE GOODS
- AGRICULTURE PRODUCTS
- CROPS, GRAIN PRODUCTS
- SEEDS, COTTON AND WOOL
- LAB TEST OF COMMODITIES
- TEXTILE & TEXTILE PRODUCT
- FERTILIZERS OTHER CHEMICALS
- GAS, PETROLEUM, PETROCHEMICAL PRODUCTS
- NATURAL RESOURCES AND REFINED PRODUCTS

PRE SHIPMENT INSPECTION

Also called PSI, is an important and reliable quality control method for ensuring that the goods supplied by the seller to the buyer strictly complies with the contracted specifications. After ordering a number of articles, the buyer lets a third party quantity and quality control the ordered goods before they are dispatched to him. Normally an independent inspection company is assigned with the task of PSI, as it is in the interest of the buyer that an independent third party verifies the quantity and quality. This way the buyer makes sure, he gets the goods he paid for. Pre-shipment inspection can greatly avoid the risk of fraud and ensure that clients get quality products from suppliers. The pre-shipment inspection is utilized for:

- Checking the total amount of goods and packing
- Controlling the quality and/or consistency of goods
- Verifying compliance with the standards of the destination country.

PRE PURCHASE OF VESSELS/SHIPS

A pre-purchase survey is an in-depth, thorough evaluation of all the vessel's systems. When conditions permit, the inspection includes operational testing of all equipment. The vessel must be hauled out of the

water for hull inspection. A sea trial is also highly recommended and is generally included in the cost of the survey when conditions permit and the sea trial is conducted on the same day as the inspection. Other inspections include rigging, machinery and electrical systems. Given today's complicated vessel system, specialists should be consulted when circumstances dictate such as with large diesel powered machinery and complicated electronic systems. A Pre-purchase Survey report is

designed to assist you in post survey negotiations, scheduling required repairs, completing routine and preventive maintenance as well as making decisions for upgrades in the near and distant future. A pre-purchase survey is a systematic, thorough, and operational evaluation of the entire vessel's structure, systems and equipment that includes, Hull, deck, & structure, Machinery installations, Fuel, Exhaust and Electrical systems, USCG-mandated safety gear, cargo gear and Operational test of monitoring.

OFF-HIRE/ON HIRE OF VESSELS/SHIPS

When hiring a vessel the charterers have the responsibility for returning the vessel to the owner in much the same condition as she was in at the beginning of the charter, including the quantity of Bunkers onboard. To ensure this, it is usual for the parties to retain the services of a surveyor at the beginning / completion of the charter to record the condition principally of the cargo gear, the holds and ship's structure in the vicinity of the cargo working areas. A full report is generated. Documentation/ on hire status report, including colour photography if required of any vessel damage noted, similarly for vessels completing a charter, an off-hire survey is conducted, and a full report generated.

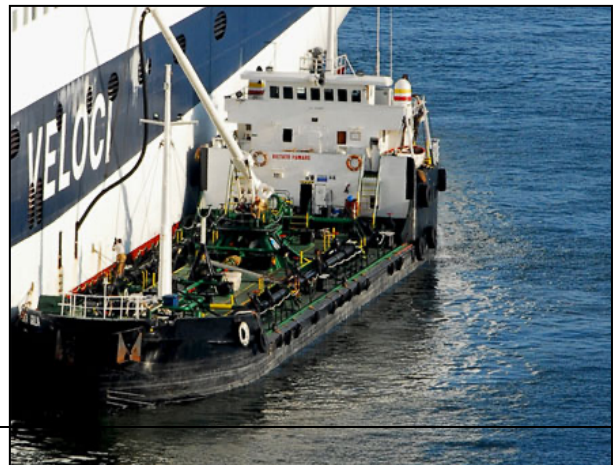

OFF-HIRE/ON HIRE OF CONTAINERS

ATLANTIC SURVEYORS (PVT.) LTDLLC specializes in providing inspections on tank containers, reefers and box containers, providing the most common services, in addition to a wide range of specialized services. These services include periodic 2½ and 5 years inspections, gas free inspections, wall washes, lab-analyses and insurance assistance. If a tank passes the test a certificate is issued stating that the container can be in-service for a specific period of time. Tank Container, Rail Tank Car and Box Container Inspections, All common and special surveys are performed. Examples of these surveys are on-hire surveys, off-hire surveys, cleanliness inspections and for the rail tank cars, verification. All the reporting is provided electronically and is also stored on our servers. The protected, user friendly, database allows you to search your reports over the years.

BUNKERS SURVEY

Bunker surveys offer an independent and impartial quantity measurement service for marine fuels. We provide comprehensive documentation for each survey to support any shortage claims or quality disputes. Our bunker quality and quantity survey is known to be the most thorough fuel measurement service in the market and involves:

- Pre-delivery tank measurements on both the bunker tanker and the receiving vessel

- Proper fuel sampling procedures
- Post-delivery tank measurements on bunker tanker and receiving vessel
- Photos on sampling where permitted
- Re-calculation of quantity delivered and received based on tested density
- Comprehensive survey report

For easy access we have an extensive network of surveyors who can provide bunker quantity measurements in major ports of call. Periodic skills upgrade and regular on-the-job inspections by senior staff help our surveyors maintain top service quality at all times.

LNG AND LPG SURVEY

This consists of quality & quantity surveys of Liquefied Petroleum Gases and Liquefied Natural Gas vessels with supervision of Pipeline transfers and calibration of Storage Tanks.

LNG is liquefied natural gas, which is the very cold liquid form of natural gas. LNG carriers are generally specialised ships transporting LNG at its atmospheric pressure boiling point of approximately -162 degree C, depending on the cargo grade. LNG carriers were typically in the range 80-135,000 m3 up until 2006 while ATLANTIC SURVEYORS (PVT.) LTD was the first company in Pakistan who inspected the LPG vessel back in 1993 and never looked back every since.

LOADING/DISCHARGING SUPERVISION/SUPERINTENDANT

Loading and discharge supervision is part of a range of other transportation & shipping services for the industry which include, Cleanliness inspections, Logistic support, Damage surveys, ATLANTIC SURVEYORS (PVT.) LTD. Loading and discharge supervision expertise for the industry comprises of:

- Sampling and testing for quality, Quantity and Weight verification, Packaging & labeling verification, Control of loading and discharge operations, Grading and certifying the reception of produce and shipments, Temperature monitoring, Traceability

POST STUFFING INSPECTION

- The doors and, if applicable, roof covering have been carefully closed.
- Closures are secured with metal and other seals in order to reduce the risk of theft.
- If the cargo is covered with tarpaulins in special containers: the tarpaulins are securely fastened.
- Old adhesive labels have been removed. For refrigerated containers with refrigeration unit and heat-able tank containers: the correct temperature has been set. For refrigerated containers, the temperature recorder is running and the temperature is displayed.

HATCH INSPECTION

Hold and hatch inspection is part of a larger service that ATLANTIC SURVEYORS (PVT.) LTD. provides to assure that the shipped material will be received in the same condition as when it was loaded. Buyers or sellers can order visual inspection of the hold prior to loading. This gives both parties the confidence that the cargo will not be contaminated by material already in the hold, or altered in any way by vessel deficiencies. Our inspectors will immediately report any abnormalities to the appropriate authority. Digital photographic documentation is also provided. Certificates of inspection are provided upon completion of the job, thereby minimizing transit losses.

CONTAINERS INSPECTION

Containers Stuffing/De stuffing

Before packing inspection involves the inspection and checking of container inside and outside where the following are checked and verified.

Outside of container:

There are parameters and specifications check during the container inspection from outside of the containers, i.e. No holes or cracks in walls or roof, Doors operate properly, Closing devices operate properly, No adhesive labels from the previous cargo, e.g. IMO placards, For flat racks: stanchions (if ordered) are complete and correctly fitted. For 40' flat racks: all lashing belts are present, For open-top containers: roof bows are complete and correctly fitted, For open-top containers: tarpaulins are undamaged and fit properly; ends of tarpaulin ropes are undamaged; all roof eyes are present, For hard-top containers: roof is undamaged, roof locking mechanism fits and operates properly.

Inside of Container:

For inside inspection of the container there are parameters need to be consider, i.e. Container is watertight. Test method: enter container, close both doors tightly and look for incoming light (e.g. through cracks, holes, door gaskets etc.), Container interior is absolutely dry. (Wipe up any condensation or white frost in order to avoid corrosion and moisture damage of the cargo.), Container is clean, free of cargo residues and neutral in odor, No nails or other protrusions, which could damage the cargo.

INSURANCE CLAIMS

We are on the panel of major insurance companies of Pakistan and have successfully carried out the following on behalf of insurance companies.

- Assessors / loss adjusters, Investigation of marine claims
- Assessment of loss within the scope of applicable policy
- Adjustment of loss as per terms / conditions of relevant insurance policy
- Salvage and disposal of partial losses and CTL goods.

MARINE AND INDUSTRIAL CONSULTANT

Marine & Industrial Consultants from the last two decades is serving not only the National Shipping Companies but also many foreign shipping companies with a wide range of products available for logistics and industrial usage.

- As the authorized agents for of various cargo and shipping companies we have been providing services and technical consultancy for shipping related activities
- We also offer: -We are ONE-STOP company for all your shipping as well as Industrial needs. We assure you our best services and close attention at all times.

ATLANTIC SURVEYORS AFGHANISTAN

ATLANTIC SURVEYORS (PVT.) LTD Afghanistan engaged in inspection and surveying activities, our inspectors and surveyors provide supervision services around the clock, seven days a week. From the moment of nomination receipt to electronic delivery of our detailed inspection report, you can be sure that our expert surveyors, tallymen and inspectors are protecting your interests. We have experience and product knowledge of a vast range of commodities and offer highly competitive rates. Whether your cargo is in bulk, bagged or liquid form, allows ATLANTIC SURVEYORS (PVT.) LTD Afghanistan to represent you at stores, production sites and ports throughout the world:

- Grading
- Tallying
- Loss prevention
- Size verification
- Calibration checks
- Marking verification
- Radioactivity testing
- Temperature testing
- Bagging supervision
- Explosive free checks
- Moisture determination
- Representative sampling
- Water Ingress investigation
- Damaged cargo investigation
- Random bag weight verification
- Inspection for manufacture defects
- Rejecting out of specification product
- Supervision of stevedoring operations / stowage
- Cross referencing product discharged against packing list
- Checking transport is clean and acceptable to carry product
- Witnessing packing and banding to ensure appropriate application
- Silver Nitrate testing (to check whether water present is saline or fresh)
- Quality control - checking product conforms to contractual specifications
- Full supervision of discharge ensuring product is handled in a correct manner
- Weighbridge control issuing all drivers with our own weighbridge control tickets
- Full supervision of loading ensuring product is stowed correctly aboard vessel or into container

ATLANTIC SURVEYORS (PVT.) LTD IN CONSULTANCY

We offer our expertise and assistance for getting their organizations ISO certified. The certification is based on good manufacturing processes practiced by the concerned party and quality of its' products / services. Our team of experts has extensive experience in designing and implementing corrective and preventive action systems that prevent problems from recurring in future. We provide services for all the major standards prevailing in the world. These standards range from Quality Management, Information Security Management, Food Safety Management, Environmental Management, Software Management, Health & Safety Standards, Marine Services and other Garment & Apparel Industry Standards, our services includes the:

- Writing manual, Establishing Company's policy & measurable objectives.
- Creating efficient system for controlling distribution and re-issue of documents.
- Monitoring processes to ensure they are effective
- Keeping adequate records
- Checking output for defects with appropriate and corrective action where necessary
- Regularly reviewing individual processes and the quality system itself for effectiveness
- Facilitating continual improvement

ACCREDITATIONS GUIDE

Working with sister concern accredited company for ISO 17020 & ISO 17025 our professional know very well how to develop from ground to the top structure of the organization as per the international accreditation requirements. The accreditation is making the organization unique among the competitors; give edge to promote the culture of confidence in monitoring and testing.

ISO/IEC 17020:1998:- General criteria for the operation of various types of bodies performing inspection

ISO/IEC 17025:2005: - General requirements for the competence of testing and calibration laboratories

QUALITY SYSTEM

Affirms conformity of an Organisation's Quality Management System to international reference standards, we provides Quality Management Systems consultancy in different market sectors on the basis of the following standards:

- ISO 9001:2008, QS9000, (Automotive sector)
- Qualitative / Quantitative assessment

The services based on the assessment & QMS implemented on the basis of the ISO 9000 standard(s), Inspection methods, & performance parameters of the service on the basis of the applicable documents,

assessment of the performance characteristics of the service established by the client.

FOOD SAFETY

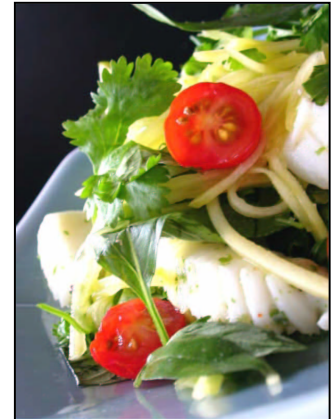

One stop shop for product safety and quality solutions, from farm to fork, consulting, training, management of your programs, or auditing, our progressive experience in various industries enable us to provide reliable, cost - effective and sustainable solutions to the food, packaging, pharmaceutical, and distribution industries.

We understand the uniqueness of every business and offer tailored solutions to meet specific needs. Our experts are recognized industry professionals that integrate their technical expertise, practical experience to develop both effective and sustainable solutions. We offer our highest commitment to develop the strategy based on Food Chain Traceability Management System. The reference standards for this scheme are:

UNI 10854:1999 – HACCP, BRC - Global Standard – Food

Food Safety Management System FSMS ISO 22000

Implementation of these standards will be applicable & requirement of food processors, retailers, packaging material, warehouses, distribution centres, pharmaceutical and personal care products.

CERTIFICATION OF INFORMATION SECURITY MANAGEMENT SYSTEMS

The instrument for optimum management of the various factors associated with information protection. ATLANTIC SURVEYORS (PVT.) LTD offers an innovative certification scheme based on ISO/IEC 27002:2005, not only to new economy - service providers, e-commerce operators, Certification Authority, outsourcing companies for information technology systems - but also to companies in the banking, insurance and traditional business sectors.

ENVIRONMENTAL CONCERN

Environmental protection is global concern in recent era based on the company's specific potential, consultancy in the environmental systems in the most varied market sectors, we drawn up specific environmental schemes and legislations issuing by the municipal districts, government structures, public utilities, service companies, tourist-reception. Environmental assessment and review studies include:

Initial Environmental Examination, Environmental Impact Assessment

Environmental Monitoring & Control Plan, Environmental Laws, Environmental Audits, Green Certification, ISO 14001, Clean Developed Mechanism (GHG, Carbon Foot Print and JI) base on Kyoto Protocol

WORK PLACE HEALTH AND SAFETY

An analysis and control instrument of company safety, through careful monitoring of the sources of risk, analysing the safety management of production/ construction sites and/or services on the basis of the International safety standards and national laws, Compliance with this specification makes it possible to

analyse problems and adopt the relevant preventive actions to minimise professional risks during all the work phases. **SAFETY ASSESSMENT & MANAGEMENT** performed to identify the Process Hazard, Root Cause Analysis and Incident Investigation, motivate the organization and workers towards the Safety Culture

Assessment and Training. The risk management is based on:

- Catastrophe Modeling, Natural Hazards Risk Management
- Emergency, Preparedness & response
- Facility Sitting and surrounding Hazard Analyses (HAZID, HAZOP, LOPA)
- Risk Assessments (PRA, QRA, FMEA), Security and Vulnerability

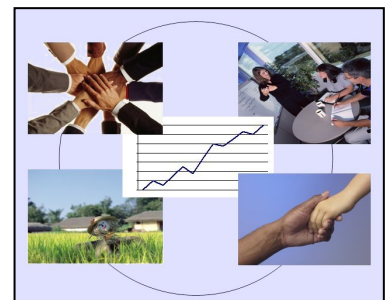

INTEGRATED MANAGEMENT CONSULTING

A single, avant-garde scheme to achieve excellence in multidisciplinary international standards, e.g. Quality, Environment, Occupational Health & Safety, Corporate Social Responsibility and other applicable norms to integrate company management system:

- Maximise values, Combining the qualitative and qualitative needs, Respect for the environment & reduce environmental risks, Regard for worker health and safety to make it priority, Social impact, values of humans
- The project makes it possible to identify for each area of the Management System, not only compliance with the standards but also each requirement of the standard, assessment criteria will be applied relevant to application of the requirement.

CORPORTATE SOCIAL RESPONSIBILIT

An effective way to demonstrate company performance visibility as regards social development sustainability, compliance with the international standards represents a responsible approach by the Organisation to the social problems of work. The consultancy of ATLANTIC SURVEYORS (PVT.) LTD designed as per the local and the international laws refers to the human responsibility work with the organization and for the organization.

The practices standards are:

FLA & FLO-CERT, SEDEX

CT-PAT, ISO 26000 (GUIDELINES)

BUYER'S CODE OF CONDUCT

RESPONSIBLE FOR SOCIAL CARE

SA 8000:2007 – SOCIAL ACCOUNTABILITY

BSCI (BUSINESS SOCIAL COMPLIANCE INITIATIVE)

WRAP (WORLDWIDE RESPONSIBLE APPAREL PRODUCTION)

PRODUCT CERTIFICATION

Increasing attention and enhancement of products traceability developed system to enhance and identify the product and its special characteristics as for example origin, production characteristics, use of particular raw materials, recipe, etc. Approval and subsequent verification of compliance of the product with the reference document prepared by the client makes it possible to use the mark on products, ensuring greater emphasis and visibility to production.

- **GOTS, REACH, OEKOTEX, GLOBAL GAP, EC MARKING, EPD AND LCA, MACHINES, ORGANIC CERTIFICATION, MARINE EQUIPMENTS, PRESSURE VESSELS & EQUIPMENTS, RECREATIONAL CRAFT, LIFE CYCLE ASSESSMENT OF A PRODUCT (LCA), PERSONAL PROTECTIVE EQUIPMENTS**

GREEN SHIPYARD CERTIFICATION

The IMO, European Union, Environmental concern groups are focused to impose the green ship recycling which comes under BASEL and Hong-Kong Convention according to which

“ship recycling facilities are designed, constructed, and operated in a safe and environmentally sound manner in accordance with regulations. An authorization process is required with inspection, monitoring and enforcement provisions, including powers of entry and sampling. Ship recycling facilities shall establish management systems, procedures, and techniques that do not pose risks to the workers concerned or to neighbors and that, to the extent practicable, eliminate adverse effects on the environment, taking into account guidelines developed by the IMO”.

BASEL CONVENTION

*the world environmental
agreement on wastes*

The international standard ISO 30000:2009(E): Titled ***“Ships and marine technology- Ship recycling management systems Specifications for management systems for safe and environmentally sound ship recycling facilities”*** has been developed by ISO Geneva in 2009. The consultancy / compliance related in the ship yard involve:

- **Engineering Verification and Specialized Analysis**
- **Mechanical Integrity Programs**
- **Project Quality Management**
- **Onsite Pollution prevention & reduction**

PROJECT MANAGEMENT & MONITORING

ATLANTIC SURVEYORS (PVT.) LTD work experience more than 25 years with the national and international projects monitoring, give us edge to our competitors, projects monitoring for Chemical, medical, textile, electrical, mechanical, food, agriculture and civil engineering, other than that ATLANTIC SURVEYORS (PVT.) LTD prepared the feasibility reports & studies for the project launching and for the running projects, we also developed and prepared organizations for the ***National & International Business Award Preparation.***

IN-HOUSE / ON-SITE TRAINING SERVICES

Training and communication are central to the success of any management. We offer the training, which could be used by any organization, service or manufacturing, embarking upon international referred standards / programs. ATLANTIC SURVEYORS (PVT.) LTD consultants designed variety of accredited / un-accredited training programs as per the requirements of the industry; these programs were modified and updated as per the national / international amendment in the laws and standards.

- **Marine Safety**
- **Internal Auditing**
- **HR Management**
- **Organic Certification**
- **Green Certification**
- **Operation Management**
- **Factory Act & Labor Laws**
- **NDT & Technical Trainings**
- **National Environmental Laws**
- **Corporate Social Responsibility**
- **Job Safety Analysis (JSA or JHA)**
- **Fire Fighting & First Aid Training**
- **Hazard Analysis & Critical Control Point**
- **HALAL & Food Safety Management System**
- **Quality / Environmental Management System**
- **Occupational Health & Safety Management System**

- **Understanding & Implementation of ISO 17025 for laboratories**
- **Understanding & Implementation of ISO 17020 for Inspection bodies**
- **AND OTHER Value added trainings as per requirements of client**

HR CONSULTANCY

ATLANTIC SURVEYORS (PVT.) LTD Consultant has specialized in representing qualified HR professionals for direct-hire, contract and consulting positions with companies of all sizes. Our knowledge of the human resources field and links to our local business communities attracts candidates who excel in their chosen specialties. Our hiring options allow our clients to choose the staffing strategy that best meets their needs. ATLANTIC SURVEYORS (PVT.) LTD Consultant one of the high rank HR consultancy in Afghanistan specialized in Staffing of Banking sector.

ATLANTIC SURVEYORS (PVT.) LTD ENGINEERING:

Mission Statement: To develop and deliver cost effective technology solutions in engineering consultancy sectors ensuring 100% customer satisfaction.

ATLANTIC SURVEYORS (PVT.) LTD is a professionally managed organization dedicated to application engineering .We specializes in providing following user specific services:

- Sale & Purchase Of Boilers & Compressors (New & Used)
- Fabrication And Erection
- R/O & Softening Plants
- Economizer, Pressure Tanks, Storage Tanks & Cooling Towers
- Automation & Servicing of Boilers, Compressors etc
- Boiler and R/O Chemicals and Accessories
- Insulation & Ducting
- Technical Manpower services.

When you work with ATLANTIC SURVEYORS (PVT.) LTD's Inspection Services, you work with the BEST. Highly trained and Professional attitude is what you get from our rich pool of human resource.

The high-tech equipments used ensure authentic results and the dedicated team delivers time-oriented accomplishments. Sophisticated state-of-the-art technologies and manpower facilities are what make ATLANTIC SURVEYORS (PVT.) LTD a reliable procurement source. The wide area of its application in the industry is its key characteristics. Customer-satisfaction being its core goal, efficiency in all its wings is a norm here.

The adequate support, infrastructure, manpower, technologies, services is all there with ATLANTIC SURVEYORS (PVT.) LTD's Inspection Services. All that is needed is moving your fingertips and getting in touch with us –to enable us to help you recognize and maximize your end goal- i.e. Profits.

STANDARD NDT METHODS:

Non-Destructive Testing (NDT) is divided into various methods, each based on a particular scientific principle. These techniques, owing to the specific nature of each, may be effective for certain applications but of little or no value in other applications. Therefore, choosing the right method and technique is an important part of the performance of NDT.

We provide the following standard NDT services throughout our network in more than 30 countries:

Visual Inspection (VT)

Dye/Liquid Penetrant Examination (PT)

Magnetic Particle Testing (MP)

Ultrasonic Testing (UT)

Radiographic Testing (RT)

Positive Material Identification (PMI)

Have a look also at our Advanced NDT Methods.

In every stage of an asset's lifecycle, ATLANTIC SURVEYORS (PVT.) LTD contributes added value NDT services.

Our NDT Services are integrated with AIM Solutions, Material Testing Laboratories and Supply Chain Services.
--

ATLANTIC SURVEYORS (PVT.) LTD'S INSPECTION SERVICES's Non-Destructive Testing Services are packaged around your assets and production processes

ATLANTIC SURVEYORS (PVT.) LTD is your reliable partner for NDT present in all major industrial countries around the world offering a global integrated NDT network
--

We protect your investment throughout the asset life cycle
--

Failure Analysis and Failure Prevention:

The Objective:

If a component or product fails in service or if a failure occurs during manufacturing, the cause of the failure needs to be determined in order to prevent future occurrences and/or to improve the performance of the device, component or structure. Now, more than ever before, Failure Analysis and Failure Prevention has become a must for industrial development.

The Solution

ATLANTIC SURVEYORS (PVT.) LTD solves the problems related to unexpected failures by carrying out Failure Analysis and Failure Prevention. Our technical experts are qualified engineers with industrial skills, local accreditations, extensive experience in a variety of Failure Analysis techniques, and academic degrees (PhD. or Masters degrees in Mechanics and Metallurgy). Thanks to a professional Failure Analysis, our experts have successfully identified the causes of failure in over 1,000 investigations

Within the scope of our Failure Analysis and Failure Prevention services we offer short turnaround times and creative problem-solving. Our fully equipped testing laboratories provide rapid and accurate results for more than twenty different tests such as chemical analyses, mechanical testing, metallography, welding tests, etc.

Our Services for Failure Analysis and Failure Prevention

The ATLANTIC SURVEYORS (PVT.) LTD service portfolio for Failure Analysis and Failure Prevention includes:

- **Corrosion Evaluation**

Corrosion may result in complete failure or malfunctioning of components. ATLANTIC SURVEYORS (PVT.) LTD considers a range of factors during a corrosion evaluation, such as: the type of corrosion, the corrosion rate, the extent of the corrosion and the interaction between corrosion and other failure mechanisms. ATLANTIC SURVEYORS (PVT.) LTD can help you to assess and mitigate your corrosion problems as well as finding the best alloy and/or coating to comply with your specific usage and conditions.

- **Fire Explosion Investigation**

The main goals of our investigations are to determine the root causes of a fire and to assess the amount and type of damage, so that the equipment or structure can be put back into service safely and efficiently. Our investigators will look for two main types of evidence: the temperature reached and the duration of the fire at that temperature. This information is used to determine the extent of the damage to the structures involved, even when no damage is visible. Our team also regards the nature of the fuel of the fire and the ignition source. This information helps us to determine how the fire began.

- **Expert Witness**

ATLANTIC SURVEYORS (PVT.) LTD can provide engineers for expert witness testimony (defendant/plaintiff) from the initial legal proceedings through to the trial stages. We provide on-site accident investigation, fire and explosion investigation, engineering analysis and evaluation of conformance to industry specifications. Our engineering experts perform reviews of other expert reports, identify the root causes of the failure, provide forensic macro and micro photographic documentation and conduct industrial and consumer product failure analyses.

- **Design Review**

This provides a systematic, comprehensive, and documented analysis of a design, to determine its capability and adequacy to meet requirements. A design review also serves to identify any present or potential problems. ATLANTIC SURVEYORS (PVT.) LTD provides a complete preliminary design review to guarantee the conformity and the quality of your industrial projects.

- **Training**

ATLANTIC SURVEYORS (PVT.) LTD offers training sessions, seminars, and lectures for companies that are interested in improving their employees' skills and enhancing the quality of their products. We mainly focus on practical issues, such as the quality of welding joints and the identification of typical defects, basic failure analysis and prevention, metallic materials for non-metallurgists and the typical failure modes of mechanical components.

INDUSTRIAL MANUFACTURING & TRADE:

In our global economy, production of industrial products and parts is being carried out wherever it can be done most favorably and then shipped to the final destination. Quality, conformity and safety of industrial products play a major role in the worldwide supply chain. Many countries require that products conform to national, regional or international safety standards. Proof of conformity with these standards often demands product testing and/or certification by an independent accredited or notified body. Customs authorities will often request a valid certificate at the point of entry into a country or economic area.

ATLANTIC SURVEYORS (PVT.) LTD Industrial Services helps manufacturers to assess their suppliers, supervise them during production and keep track of delivery schedules. We physically inspect and check the quality and quantity of deliveries and we test samples. With our unique global network, we can rate vendors within hours or days, in every corner of the world. ATLANTIC SURVEYORS (PVT.) LTD can trace the whole supply chain and ensure you that the best possible quality is guaranteed.

ATLANTIC SURVEYORS (PVT.) LTD has the necessary accreditations to provide certification services for various markets, including the Russian Federation, Iran, Colombia and Egypt, and is also a Notified Body for most European directives such as PED, Machinery and Lifts Directives.

▼ Industrial Manufacturing & Trade

- ▶ CE-Marking - Certificate of Conformity Europe
- ▶ Coating Inspection and Failure Analysis
- ▶ Construction Materials Testing
- ▶ Design Verification
- ▶ Failure Analysis and Failure Prevention
- ▶ Manufacturing Inspection and Technical Inspection
- ▶ Mechanical Testing
- ▶ Metal Testing
- ▶ Non-Destructive Testing
- ▶ Polymer Testing
- ▶ Pressure Equipment Certification
- ▶ Product Certification – New Industrial Machinery
- ▶ Product Certification – Used Machinery
- ▶ Quality Assurance and Quality Control
- ▶ Technical Consultancy for Building Materials
- ▶ Technical Documentation
- ▶ Traffic Management System Services
- ▶ Vendor Assessment / Technical Audit

IN-SERVICE INSPECTION:

Many assets such as production facilities, refineries, petrochemical and power plants must be regularly closed down or taken out of service for planned maintenance operations. Such shutdowns and

turnarounds require specialist competencies to minimize downtime while covering all maintenance and repair tasks and still meeting all regulatory requirements.

ATLANTIC SURVEYORS (PVT.) LTD has implemented a combination of high-end specialized consultancy with traditional inspection and testing services to assist clients in **managing shutdowns and turnarounds as well as routine maintenance**. With the numerous accreditations ATLANTIC SURVEYORS (PVT.) LTD holds all over the world, we can carry out periodical statutory and voluntary inspections of for all kinds of equipment, including pressure vessels, tanks, lifts and elevators, cranes, electrical installations and gas distribution systems.

In-service Inspection

- **Coating Inspection and Failure Analysis**
- **Commissioning and In-Service Inspections for Wind Farms**
- **Corrosion Monitoring**
- **Crane Inspection and Inspection of Hoisting and Lifting Equipment**
- **Electrical Installations Certification**
- **Failure Analysis & Failure Prevention**
- **Industrial Rope Access**
- **Inspection & Technical Assistance during Turnarounds**
- **Non Destructive Testing**
- **Pipeline Integrity Management**
- **Pressure Equipment Certification**
- **Risk Based Inspection**
- **Storage Tank Inspection & Calibration**
- **Valve & Instrumentation**

OIL, GAS AND PETROCHEMICAL INDUSTRY:

Integrity, safety and reliability are major concerns for those involved in the oil, gas and petrochemical industry. From design through to operation for various asset types, our global network of experts provides a diverse portfolio of services to ensure that installations, material, equipment, facilities and projects meet all quality and performance requirements, whether they are regulatory, voluntary or customer based. Our teams of engineers and technicians will find the solutions that best suit your needs, whether they are related to exploration and production, pipelines, LNG terminals and carriers, refineries, storage tanks, petrol stations or any other type of asset.

With multi-disciplinary teams of experts, ATLANTIC SURVEYORS (PVT.) LTD offers a wide range of inspection, testing, certification and verification services to all parties involved in the oil, gas and petrochemical industries around the world, including owners, operators, contractors, investors and equipment manufacturers. Our integrated approach of specialized solutions and traditional services focused on the complete asset lifecycle adds value to any project and improves the productivity of any existing facility.

- ▶ Storage Tank Inspection, Audit and Calibration
- ▶ Technical Consultancy for Building Materials
- ▶ Technical Staffing Services
- ▶ Valve and Instrumentation Calibration and Maintenance

Business Vision:

ATLANTIC SURVEYORS (PVT.) LTD is Committed to provide one window Engineering Solutions to all its National & International Clients and to become the largest Engineering Solution Provide throughout Pakistan.

Core Business:

ATLANTIC SURVEYORS (PVT.) LTD's primarily deals in the vast supply & services in the field of Control Instrumentation & Automation for commercial & Industrial needs. Our services and supplies are as follows.

1. Process controls. (Pressure, Temperature, Level & Flow).
2. Process monitoring. (Pressure, Temperature, Level & Flow).
3. PH, Humidity Measurement & Controls.
4. Conductivity Measurement & Controls.
5. Batch Control & Chemical dosing Systems.
6. PLC (Programmable Logic Control) & data acquisition.
7. Centralized Monitoring & Data logging system (Scada, HMI).
8. Control Valves. (2 way, 3 way)
9. Pressure Regulators.
10. Used Boilers with Value addition.
11. New Waste Heat Recovery Boilers (WHRB).
12. New/Used Burners (all fuels)

13. Combustion fuel Analysis (Energy Conservation)
14. Plant Automation, Design & Engineering.
15. Complete Project Management.

OUR PRINCIPALS & PRODUCTS.

Heat Recovery Boilers for Power Generators:

Clayton Boiler, USA. World's Top Class Heat Recovery Boiler Manufacturer. Quick Steam Generation due to Compact Coil tube type shape and easily replaceable Coil tubes. No extra bypass System required for this Boiler.

Complete Boiler Automation, from Panel Designing to Instrumentation or replacement of any Existing Burner with New/Used Burners or Dual fuel Burners.

PLC (Programmable Logic Control) Automation:

Complete Turnkey Solutions for your application, from Logic Programming in PLC to Panel Designing and Field Instrumentation for PLC with our below mentioned Brands.

Scada HMI (Human Machine Interface) Software & Touch Screen Panels:

Development of HMI (Visualization Software) and its communication with PLC with all below mentioned Brands. Touch Screen HMI is also a very useful tool for Operator Interface.

Paper and Paperless Recorders with Data Acquisition modules:

Brainchild, a Product which is highly capable of recording up to 18 Analogue Inputs in a single unit with trends and history with High Resolution Graphics.

Thermal Mass Flow meters for Natural Gas & Air:

Eldridge Products, Inc (EPI) is highly accurate product for measuring flow/mass of all types of Gases and Air. We supply this flow meter on large scale to M/s Allied Engineering Services (Pvt) Ltd and they Install this flow meters on all their New Gas Gensets.

Differential Pressure (DP), Pressure, Level, PH, ORP

Transmitters:

DP Transmitters widely used for flow measurement, and we use the below products for Process Flow measurement. Plus few of these products are also used for Pressure & Level Monitoring & Measurement.

YOKOGAWA ♦

ROSEMOUNT

Honeywell

MSI Scantech

Danfoss

FLOWLINE

Multivariable Process Controllers/Totalizers:

Design, a multivariable Programmable Process Controllers which can not only totalize the Process flow but can also Perform Density Compensation, by taking three Universal Analogue inputs at a time. This can also be used for three element control at Boilers.

Vortex Flow meters:

A flow meter which can measure all type of fluids & Gases (liquid, Steam & Gas) with high precision. This product is also available with Density Compensation.

YOKOGAWA ♦

AALBORG

Coriolis Mass Flow meters:

World's No. 1 and highly Precise Coriolis Mass flow meters for liquid and gases.

RHEONIK

Mechanical type Water & Oil Flow meter:

These flow meters are a low cost solution, for measuring water. Our below product has a unique feature of Pulse output, which is very cost effective when you are connecting such product with PLC and want to get centralized data recording system.

Electromagnetic Liquid flow meters:

These flow meters are highly precise flow meters with turndown ratio of minimum 200:1 and used at all type of liquids with conductivity of more then 5 mice siemens. We deal in both New/Used flow meters with below mentioned brands.

Ultrasonic Liquid flow meters:

These flow meters are as highly precise flow meters with portable Display Unit for various line sizes. This flow meter can easily installed over the lines, from ½" to 12", without cutting it and can display the exact flow of liquid up to the temperature of 160 °C.

Our Strength:

- **Solution Serving Approach for every required application.**
- **ATLANTIC SURVEYORS (PVT.) LTD way of problem solving.**
- **Fastest After sales support.**
- **Annual Maintenance Contracts.**
- **Pre-define Procedures for product updates.**

Our Qualities:

One may only be satisfied with the worlds most high-tech Solution because he can Afford it, But this will not be a Universal Solution, the other can be satisfied with a Low Cost Reliable solution.

We are Proud to serve Industry with ATLANTIC SURVEYORS (PVT.) LTD's Solution, which are ATLANTIC SURVEYORS (PVT.) LTD's Inspection Services high-tech and low Cost too. Such solutions are not only approach to the end user but also attract the investors to involve their capital. So with this combination of Solution providing we are very successful in getting the rapid business from our market.

“The solution which provides you the desired results in desired time with desired resources.”

With our Centralized reporting system, our Sales, support and Maintenance team always get connected and all projects updates are available with our office. This helps a lot to customers while Job execution to get maximum outputs.

Our Staff is well Experience and trained, respect to our entire product range, the best part is that our Engineers are well capable of using any new product within short period of time. This Capability makes ATLANTIC SURVEYORS (PVT.) LTD's far too effective then any other organization.

On-call support, after startup support and operational staff training are the basic services of any Engineering company to grow. All these parameter are strongly covered by our team and due to these services we are capable of getting good response from Market.

Lab & Equipments:

ATLANTIC SURVEYORS (PVT.) LTD's have its own Calibration Lab where all the necessary Equipments & Instruments are available for the Testing and calibration of all Instruments. This Lab includes Heart/Smart Calibrators, Pressure and temperature Calibrators with Source generation. Compressed Air for Checking and calibrating DP and Pressure Transmitters. PLC programming simulation is also done in this lab for least time consumption in field.

Experience:

Basic Engineering Setup is being run by Director Technical, Who has an experience of more then 15 Years in the field of Control Instrumentation and Automation, in Pakistan and out side Pakistan. All our Engineers and technical Staff are well trained and experienced of more then 5 Years. All of them were Managed and supervised by our Director Technical.

OUR VALUABLE CLIENTS

ATLANTIC SURVEYORS (PVT.) LTD have the following client in different areas and schemes:

Organization	Scope	Activity	Origin
World Food Programme, UN	NGO - Food Supplying	Inspection & Monitoring	Pakistan, Afghanistan
Food and Agriculture Organization of United Nations	NGO - Food Supplying	Inspection & Monitoring	Pakistan
Red Crescent, Pakistan	NGO	Monitoring & Distribution	Pakistan
Pakistan State Oil Company.	Oil Marketing Company	Inspection & Survey at loading & unloading	Pakistan & UAE
<i>UNICEF, Kabul</i>	NGO	Inspection & Monitoring	Afghanistan
Pakistan Water and Power Development Authority.	Water & Energy Resources Authority	Energy & Infrastructure Survey	Pakistan
Ministry of Food & Agriculture, Govt. of Pakistan.	Food Supply & Purchasing	Food Distribution & Gowdown Survey	Pakistan
Shell Pakistan Ltd., Karachi.	Oil Marketing Company	Inspection & Survey at loading & unloading	Pakistan & UAE
Caltex Pakistan Ltd., Karachi	Oil Marketing Company	Inspection & Survey at loading & unloading	Pakistan & UAE
Pakistan Steel Mills Corporation, Govt. of Pakistan.	Steel Industry	Inspection of supplies	Karachi, Pakistan
Fertilizer Import Department, Govt. of Pakistan.	Fertilize Import Department	Inspection & Survey of Imported Fertilizer	Karach & Gawadar
National Insurance Corporation, Govt. of Pakistan.	Insurance	Insurance Survey & Claim Adjustment	Karachi, Pakistan
Defence Energy Support Center, Middle East	Water & Energy Resources Authority	Energy & Infrastructure Survey	UAE
Ministry of Water & Power, Kabul, Afghanistan	Water & Energy Resources Authority	Energy & Infrastructure Survey	Afghanistan
World Tankers Pte. Ltd., Singapore.	Oil Marketing Company	Inspection & Survey at loading & unloading	Pakistan & UAE
Kuwait Petroleum Corp.	Oil Marketing	Inspection & Survey	Pakistan & UAE

Organization	Scope	Activity	Origin
	Company	at loading & unloading	
Pak-Arab Refinery Ltd., Karachi.	Oil Marketing Company	Inspection & Survey at loading & unloading	Pakistan & UAE
Transtrade (Pvt) Ltd.	Logistics & Supply Chain	Monitoring & Survey of cargo	Pakistan & UAE
Alpine Marine Services	Logistics & Supply Chain	Monitoring & Survey of cargo	Pakistan & UAE
M. M. Marine Services	Logistics & Supply Chain	Monitoring & Survey of cargo	Pakistan & UAE
Hegge & Co. Pakistan (Pvt) Ltd.	Ship Chartering & Logistics	Booking Agent	Pakistan & UAE
Asia Marine (Pvt) Ltd., (Owners of Uni Cargo, London).	Logistics & Supply Chain	Monitoring & Survey of cargo	Pakistan & UAE
Ancora Investment Trust Inc., Greece.	Logistics & Supply Chain	Monitoring & Survey of cargo	Pakistan & UAE
Glencore, Singapore.	Logistics & Supply Chain	Monitoring & Survey of cargo	Pakistan & UAE
Pelmbrous Shipping, Greek. (Owners of the Petroleum Tanker carrying Crude Oil for Pakistan on spot cargo.)	Oil Tankers Service	Agency & Inspection	Pakistan & UAE
Foundation Gas; WakGas; LifeLine; EiradGas	Oil & Gas Tankers Service	Agency & Inspection	Pakistan & UAE
Naftomar Shipping & Trading Co. Greek	Oil Tankers Service	Agency & Inspection	Pakistan & UAE
Glaxy Maritime Co. Greek.	Oil Tankers Service	Inspections	Pakistan & UAE
Felda Marketing Services, Malaysia.	Logistics Services	Monitoring & Survey of cargo	Pakistan & UAE
Kuok Oil & Grains, Singapore	Oil Tankers Service	Agency & Inspection	Pakistan
Inter-Continental Oil & Fats, Singapore.	Edible Oil Tankers	Agency & Inspection	Pakistan
Agha Marine Services	Logistics Services	Monitoring & Survey of cargo	Pakistan
Scancom Shipping & Trading.	Logistics Services	Monitoring & Survey of cargo	Pakistan
